EXPERIENCE

LFX Mentee - CNCF Harbor

Sep 2026 – Nov 2026

Harbor-Satellite

Remote

- Designing and implementing an **opt-in peer-to-peer artifact distribution system** for Harbor-Satellite, enabling OCI images and artifacts to be served across trusted local peers in **air-gapped and intermittently connected environments**.
- Designing **peer selection, trust, retries, and failure recovery**, while building OCI manifest/blob transfer with **digest verification**, Prometheus metrics, structured logs, and multi-Satellite integration tests.

Full Stack Developer Intern

Sep 2025 – Nov 2025

CodeHelp

Remote

- Built and extended **backend services** using **Hono.js** and **GraphQL**, focusing on scalable API design and authentication with **better-auth**.
- Designed an async notification system using **AWS SQS/SNS** and collaborated with frontend teams on **Next.js** and **shadcn/ui** improvements.

PROJECTS

Shipyard (Deployment Orchestration Platform)

[GitHub](#)

- Built a Go deployment orchestration platform for static sites with containerized builds, project configuration, and MinIO (S3-compatible) artifact storage.
- Implemented a FIFO build worker with retry handling and a deployment lifecycle (queued, building, ready), running builds in Docker and persisting artifact checksums.
- Exposed REST APIs for deployment management, status polling, and log streaming; proxied through NGINX with token-based authentication.

Kronos (Event Processing Pipeline)

[GitHub](#)

- Built a distributed Go event pipeline with gRPC ingestion and Kafka fan-out to analytics, audit, and DLQ consumers, deployed on Kubernetes via Helm.
- Implemented GitOps with ArgoCD and Terraform modules for EKS, VPC, and ECR; instrumented services with Prometheus and Grafana for observability and burn-rate alerting.

TECHNICAL SKILLS

Languages & Frameworks : Go, Rust, TypeScript, JavaScript, Java, SQL, React, Express, Hono, Next.js

Infra & Tools: Docker, Kubernetes, Git, GitHub, Helm, ArgoCD, Terraform, gRPC, Kafka, Nginx

Cloud & Databases: AWS, GCP, PostgreSQL, MongoDB, Redis, Prisma

ACHIEVEMENTS

- **KCD Gujarat 2026** - Represented Harbor at the CNCF project booth.
- **KubeCon Mumbai 2026** - CNCF community attendee and Microcks volunteer.
- **Runner-up - Tambo AI Hackathon (2025):** Built *SignFlow*, an AI-powered digital signature platform with auto-generated signatures, PNG/SVG exports, and a production-ready UI.

EDUCATION

Bachelor of Engineering in Electronics & Telecommunication

2023 – 2027

AISSMS COE

CGPA: 9.05
